# Company summary

## ***We want your project to be a success story!***

Today, only 35 % of projects all over the world are carried out successfully. We want to increase this number. That's why we started Yuri Projects.

We specialize in project management with the focus on BIM and geographical data acquisition and processing within construction, infrastructure, and property management. We create values in terms of project completion on time and within the agreed budget – thanks to innovative way of thinking, positive spirit and clear communication.

We are here to help our customers to turn ideas into reality!

## Meet the founder and manager

### ***A self-made man and problem solver with passion for Dubai***

I was born in Ukraine and have lived in Sweden for the last 22 years. My journey into project management started in 2004 when I had to fight for funding to start my PhD studies in Stockholm, in tough competition with other applicants. After writing a successful project proposal, I managed to get funding for the whole period of my studies – completely on my own.

Since then, I worked with educational and research projects at the university as well as commercial projects in land surveying and infrastructure, both as a consultant and an entrepreneur.

After visiting Dubai for the first time in March 2021, I fell in love with this fantastic multicultural city, which eventually led to the establishment of Yuri Projects.

**DR. YURIY RESCHETIUK**

**APRIL 2004**

Getting funding for my PhD studies – my first successful project.

**SEPTEMBER 2010**

Starting working in my first big research project funded by EU.

**APRIL 2016**

Starting my journey as a project manager in engineering consultancy business.

**MARCH 2019**

Starting Geodesiexperten in Stockholm, Sweden's most competent educator in Land Surveying.

**NOVEMBER 2022**

Starting Yuri Projects in Dubai.

# Mission

To create values in terms of project completion on time and within the agreed budget – thanks to innovative way of thinking, positive spirit and clear communication.
